INDEX

Accidents, death rate from, 181
Age of patients at Mayo Clinic, 185
Alvarez, Walter C., and Ascanio, Hugo, Age and Sex of Patients at Mayo Clinic, 185–198
Ancestors, tables of, 252
Apoplexy, 171
Appendicitis, 175
Arboreal life and primate evolution, 225
Asymmetries in skeletons of primates, 375
Austral-Asia, migrations into, 45
Axillary hair, development of, 486

Behavior (Recent Literature), 151, 295, 446, 575
Behaviorism and the cerebral cortex, 461
Berkson, Joseph, Evidence of a Seasonal Cycle in Human Growth, 523–538
Bile passages, diseases of, 73
Births, distribution of, by occupation of father, 511
Black, Davidson, Interim Report on the Skull of Sinanthropus, 439–440
Blood characters, 277
  group indices, 130
  pressure in old age, 264
Body-weight, 277
Brain size and shape and jaw protrusion, 229, 237

Cancer, 173
Carcinoma of digestive tract, 85
Cerebral cortex and behaviorism, 461
  hemorrhage, 171
Chelsea Hospital, 264
Chest, method for computing cross-section of, 539
Cirrhosis of liver, 175
Clark, Grace, Method of Computing the Cross-section of the Chest, 539–546
Clavicle of primates, 336
Climatic changes in Europe and Asia, 55
Cobbes Questions and Answers, 137
Comparative method, importance of, 458
Consanguinity, tables of, 259
Consciousness, disturbance of, in petit-mal attacks, 547
Correlation of sums, 134
Cycle, seasonal, in human growth, 523

DAVENPORT, CHARLES B., and MINOGUE, BLANCHE M., Intelligence Quotient and Physical Quotient, 473–507
DAVIS, H. JACKSON, Blood Pressure in Old Age, 264–276
Dentition patterns of primates, 106
Descendants, tables of, 250
Diabetes, 174
DIETHELM, OSKAR, Disturbance of Vision and Consciousness in Petit-mal Attacks, 547–554
Differential fertility, 508
Digestive tract, diseases of, 67
Double monster, 19
DUBLIN, LOUIS I., Influence of Weight on Causes of Death, 159–184

Epilepsy as possession by spirits, 111
  as the dreaded disease, 118
  as the sacred disease, 115
  disturbances of vision and consciousness in, 547
Erect posture as a result of arboreal life, 232
Eruption of permanent dentition, 485
Etymology in cultural history, 110
Eur-Africa, migrations into, 49
Europe, races of, 53
EVOLUTION AND GENETICS (Recent Literature), 145, 292, 441, 569
Evolution, functional theories of, 223
Excess in activity, 467

Falling sickness, names of, 109
Femur of primates, 367
Fertility, differential, 508
"Fool things" that animals do, 464
Foot of primates, 383
FORSYTH, C. H., Decline in Average Length of Life, 199–222
Freedom of the will, 471
Functional theories of primate evolution, 223

Gallbladder, diseases of, 73
Gastro-intestinal disease, influence of sex on incidence of, 63
Genealogical methods as basis of research in human heredity, 250
GREGORY, WILLIAM K., Critique of Professor Wood-Jones's Paper, 99–108
  Erratum, 440
GROUP BIOLOGY (Recent Literature), 147, 293, 443, 571
Growth, human, seasonal cycle in, 523

Hair texture zones, 40
Hand of primates, 381
Hardcastle, E. E., 159
Head index zones, 38
Heart, diseases of, 167

HENCKEL, K. O., Remarks on the Papers by Professor F. Wood Jones and Professor W. K. Gregory Concerning the Phylogeny of Primates, 555–557
Heritage and habitus, 101
HOOTON, EARNEST A., Functional Theories of Primate Evolution, 223–249
HOSOI, KIYOSHI, and ALVAREZ, WALTER C., Influence of Sex on Incidence of Gastrointestinal Disease, 63–98
Humerus of primates, 360

Inbreeding, 254
Infections of digestive tract, 67
Influenza, 179
Intelligence quotient and physical quotient, 473
  constancy of, 499
Intelligence, two aspects of, 470
  what is it?, 462
Intermembral index, 368

Japan, paternity in, 508
Johns Hopkins Hospital, 264

KANNER, LEO, Names of the Falling Sickness, 109–127
KÄSSBACHER, MAX, Genealogical Methods as Basis of Research in Human Heredity, 250–263
  Proposal for the Compulsory Anthropological Study of Emigrants, 557–558

Land areas, distribution of, 37
LE BLANC, THOMAS J., Some Aspects of Paternity in Sendai, Japan, 508–522
Length of life, decline in, 199
Liver, diseases of, 73
Ludlow, A. I., 185

Malformations of the digestive tract, congenital, 67
Man, is he a rational animal?, 457
  why is he the dominant species?, 468
Mark Twain, 464
Marks, H. H., 159
Mayo Clinic, age and sex of patients at, 185
MEAD, CHARLES H., A Quantitative Study in Human Teratology, 1–33
"Melanesians," racial composition of, 47
METHODOLOGY (Recent Literature), 157, 301, 455, 581
Migration-zones, 34
MINER, JOHN R., Correlation of Sums, 134–136
MISCELLANEOUS (Recent Literature), 157, 302, 455, 581
Monthly variations in Mayo Clinic population, 194
Moon and epilepsy, 123
Morphological evidence of man's rationality, 459
Muhlberg, W., 159
Myres, J. L., 243

Nasal breadth and temperature, 246
Negritoes, 42
Nephritis, 170
NOTES, 134–136, 439–440, 555–558

Overweight, 159, 166

Pancreas, diseases of, 73
Paralysis, 171
Paternity in Sendai, Japan, 508
PATHOLOGY (Recent Literature), 156, 300, 453, 580
Patron saints of epilepsy, 121
PEARL, RAYMOND, An Eighteenth Century French Evolutionist, 559–566
  Cobbes Questions and Answers, 137–144
  The History of a Gesture, 566–568
Pedigree of higher primates, 402
Pelvis of primates, 346
Petit-mal attacks, disturbance of vision and consciousness in, 547
Physical age, computation of, 491
  quotient and intelligence quotient, 473
    constancy of, 502
PHYSIOLOGY (Recent Literature), 155, 300, 451, 579
Pneumonia, 178
"Polynesians," racial composition of, 47
Primate skulls, types of, 104
Primates, phylogeny of, 99
  skeleton of, 303
Pubic hair, development of, 486

QUOTATIONS, 137–144, 559–568

Races of Europe, 53
Racial criteria, 38
  differentiation, alleged functional factors in, 237
  migration-zones, 34
Radius of primates, 360
Rational animal, is man a?, 457
RECENT LITERATURE, 145–158, 292–302, 441–456, 569–581
RITTER, WM. E., Is Man a Rational Animal?, 457–472

Sarcoma of digestive tract, 90
Scapula of primates, 339
SCHULTZ, ADOLPH H., The Skeleton of the Trunk and Limbs of Higher Primates, 303–438
Seasonal cycle in human growth, 523
Self-destructive activities of animals, 465
Sendai, Japan, paternity in, 508
Serological race-classification, 128

Sex, influence on incidence of gastro-intestinal disease, 63
of patients at Mayo Clinic, 185
Shepherd, G. R., 160
Simple monster, 1
Sinanthropus, skull of, 439
Skeleton of higher primates, 303
Skin color and climate, 244
SNYDER, LAURENCE H., "Laws" of Serological Race Classification, 128–133
SOMATOLOGY AND CONSTITUTION (Recent Literature), 153, 298, 450, 578
Sophrosyne, 471
Stature, 277
Steatopygia, 243
Sternum of primates, 329
Suicides, 182
Surface-area of body, 277
Symonds, B., 160

Tail, loss of, 235
TAYLOR, GRIFFITH, Racial Migration-zones and Their Significance, 34–62
Temporal muscle area and cranial characters, 239
Teratology, quantitative study in, 1
Thomson, Arthur, 241
Tibia of primates, 367
Tooth dehiscence, 483
Tuberculosis, pulmonary, 176
Tumors of digestive tract, 90
Typhoid fever, 176

Ulcers of esophagus, stomach and duodenum, 77
Underweight, 159, 176
Union Central Life Insurance Co., 161

Vertebrae, number of, in primates, 309
Vision, disturbance of, in petit-mal attacks, 547

Weight, influence on causes of death, 159
Will, freedom of, 471
WINTROBE, M. M., Correlation of Characters of the Blood with Body-weight, Stature and Surface-area, 277–291
Wood-Jones, Frederic, critique of his paper, 99

"Zones and strata" concept, 35
